

# WATER AND POWER EMPLOYEES' RETIREMENT PLAN

## RETIREMENT PLAN OFFICE UPDATES

December 19, 2018

The Retirement Plan Office (RPO) strives to improve the services provided to our members. Below are some important updates.

### **Retirement Information System (RIS)**

RIS has been updated with new enhancements:

- Tier 2 members may now estimate their retirement allowance.
- For members with funds on deposit with LACERS, Qualifying Service is now displayed and applied to the retirement calculation for both Tier 1 and Tier 2.

RIS is available to active Plan members with network access via the RPO website: <http://retirement.ladwp.com>. If you do not have network access, computer kiosks are available in our office in the John Ferraro Building, Room 357.

### **Retirement Seminars**

The RPO has added additional Pre-Retirement Seminars for those within 3 years of their retirement. This is a full day class with speakers from our office, Social Security, Payroll, Health Plans, as well as other entities.

In addition, we also offer a half-day Early/Mid-Career Retirement Planning Seminar specific to each tier for employees interested in saving for their retirement. This is a shortened version of the full day class covering many of the same topics. All active employees of the Department are welcome to attend.

Enrollment for all classes is open on a quarterly basis. Please contact your Division Training Coordinator early to enroll as the classes fill up quickly.

### **New Retirement Website**

The RPO will be launching a new website in early January 2019. Please access the website for information on Plan benefits, Retirement Board meetings, investments, and other useful information regarding the Plan.
