September 19, 2011

*Board of Administration
The Water and Power Employees' Retirement Plan of the City of Los Angeles
111 North Hope Street, Room 357
Los Angeles, California 90012*

Dear Board Members:

We are pleased to submit this Actuarial Valuation and Review as of July 1, 2011. It summarizes the actuarial data used in the valuation, establishes the funding requirements for fiscal 2011-2012 and analyzes the preceding year's experience.

The census and financial information on which our calculations were based was prepared by the Retirement Office. That assistance is gratefully acknowledged. The actuarial calculations were completed under the supervision of John Monroe, ASA, MAAA, Enrolled Actuary.

This actuarial valuation has been completed in accordance with generally accepted actuarial principles and practices. To the best of our knowledge, the information supplied in this actuarial valuation is complete and accurate. Further, in our opinion, the assumptions as approved by the Board are reasonably related to the experience of and the expectations for the Plan.

We are members of the American Academy of Actuaries and we meet the Qualification Standards of the American Academy of Actuaries to render the actuarial opinion herein.

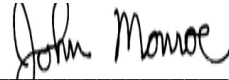

We look forward to reviewing this report at your next meeting and to answering any questions.

Sincerely,

THE SEGAL COMPANY

By: 

*Paul Angelo, FSA, MAAA, EA, FCA
Senior Vice President and Actuary*

*John Monroe, ASA, MAAA, EA
Vice President and Associate Actuary*

SECTION 1: Valuation Summary for The Water and Power Employees' Retirement Plan of the City of Los Angeles

Purpose

This report has been prepared by The Segal Company to present a valuation of the The Water and Power Employees' Retirement Plan of the City of Los Angeles as of July 1, 2011. The valuation was performed to determine whether the assets and contributions are sufficient to provide the prescribed benefits. The contribution requirements presented in this report are based on:

- The benefit provisions of the Pension Plan, as administered by the Board;
- The characteristics of covered active members, inactive vested members, and retired members and beneficiaries as of March 31, 2011, provided by the Retirement Office;
- The assets of the Plan as of June 30, 2011, provided by the Retirement Office;
- Economic assumptions regarding future salary increases and investment earnings; and
- Other actuarial assumptions, regarding employee terminations, retirement, death, etc.

Significant Issues in Valuation Year

- Ref: Pg. 9* ➤ The market value of assets earned a return of 19.2% for the July 1, 2010 to June 30, 2011 plan year. The actuarial value of assets earned a return of 3.7% for the July 1, 2010 to June 30, 2011 plan year due to the deferral of most of the current year investment gains and the recognition of prior investment losses. This resulted in an actuarial loss of \$293.1 million when measured against the assumed rate of return of 7.75% per annum. This actuarial investment loss increased the Plan's required contribution by 3.74% of compensation.
- Ref: Pg. 13*
- Ref: Pg. 44* ➤ The results of the valuation reflect changes in Plan provisions adopted by the Board for this valuation. These changes are outlined in Section 4, Exhibit VII of this report. The main change was a decrease in the interest crediting rate on employee, Additional Annuity and Department matching contributions from 8.00% to 7.75% per annum. These Plan changes decreased the Plan's unfunded actuarial accrued liability (UAAL) by \$6.9 million and the Plan's required contribution by 0.26% of compensation.
- Ref: Pg. 13*
- Ref: Pg. 13* ➤ The salaries for continuing actives increased by 3.7% from the rates in effect on March 31, 2010 to the rates in effect on March 31, 2011. Since this increase is less than the average assumed rate of approximately 5.6%, the plan experienced an actuarial gain from salary experience. This gain amounted to \$97.0 million for the current year, which decreased the Plan's required contribution by 1.24% of compensation.

SECTION 1: Valuation Summary for The Water and Power Employees' Retirement Plan of the City of Los Angeles

Ref: Pg. 21, 22

- The actuarial accrued liability exceeds the actuarial value of assets, resulting in a UAAL of \$1,832 million. The Board's funding policy determines the Department's required contribution as the normal cost increased or offset by a UAAL amortization charge or credit. Under this funding policy, the Plan's UAAL is amortized over various 15-year periods, each beginning with the year that each portion or base of the UAAL was first identified and amortized.

Ref: Pg. 12

- Under the Plan's funding policy, the required contribution rate continues to be larger than the mandatory 110% matching of the employee contribution. The required contribution increased from 38.45% to 41.82% of pay for the 2011-2012 plan year, which is estimated to be \$363.9 million. This includes amortization of the components of the Plan's UAAL over 15-year fixed periods.

Ref: Pg. 5

- The total unrecognized return (i.e., the difference between the market value of assets and the "smoothed" actuarial value of assets) changed by \$920 million during the plan year from a \$1,041 million unrecognized loss in 2010 to a \$121 million unrecognized loss in 2011. This investment loss will be recognized in the determination of the actuarial value of assets over the next few years. This means that, if the Plan earns the assumed rate of investment return of 7.75% per year (net of expenses) on a **market value** basis, then the deferred losses will be recognized over the next few years as shown in the footnote on Chart 7.
- This footnote in Chart 7 shows that under the asset smoothing method the \$121 million in net deferred losses will be recognized in the next four valuations, but in a very non-level (uneven) pattern. In particular, first there will be losses recognized in the next two years, each of which is actually larger than the total deferred losses of \$121 million. Those losses will then be followed by offsetting gains in the two years after that, so as to get to the net total losses of \$121 million. This means that, absent any new market value gains or losses in the future, there will be two more years of employer contribution rate increases followed by two years of rate decreases before the \$121 million in deferred losses are fully recognized.

In keeping with model actuarial practice in this situation, we recommend that the Board consider combining the net deferred losses of \$121 million into a single four-year smoothing "layer" and thereby recognizing those net deferred losses over the next four years in four level amounts of approximately \$30 million each year. This would reduce the volatility associated with the current pattern of deferred loss recognition and thereby result in both more stable funded ratios (on an actuarial value basis) and more level employer contribution rates. Please note that this change would also have no impact on the current July 1, 2011 valuation results as the total amount of unrecognized losses as of July 1, 2011 remains unchanged. Also, note that we recommend using a four-year smoothing period for the combined deferred losses as that will complete the recognition of those losses over exactly the same time period as under the current separate smoothing layers.

SECTION 1: Valuation Summary for The Water and Power Employees' Retirement Plan of the City of Los Angeles

- The unrecognized investment losses of \$121 million represent about 1.6% of the market value of assets. Unless offset by future investment gains or other favorable experience, the future recognition of the \$121 million in past market losses is expected to have an impact on the Plan's future funded ratio and required contributions. This potential impact may be illustrated as follows:
 - If the deferred losses were recognized immediately in the actuarial value assets, the funded percentage would decrease from 80.3% to 79.0%.
 - If the deferred losses were recognized immediately in the actuarial value of assets, the required contribution would increase from 41.82% of covered payroll to 43.36% of covered payroll.
- This year, the balance in the General Reserve and the Reserve for Investment Gains and Losses increased from \$1,820 million as of June 30, 2010 to \$1,969 million as of June 30, 2011. These two reserves track changes in the book value of assets. Consistent with prior valuations, this year we have been instructed to include all but \$74.2 million of the end of year General Reserve and Reserve for Investment Gains and Losses as valuation assets. This is approximately 1% of the end of year market value of assets.
- The actuarial valuation report as of July 1, 2011 is based on financial information as of that date. Changes in the value of assets subsequent to that date, to the extent that they exist, are not reflected. Declines in asset values will increase the actuarial cost of the plan, while increases will decrease the actuarial cost of the plan.

SECTION 1: Valuation Summary for The Water and Power Employees' Retirement Plan of the City of Los Angeles

Summary of Key Valuation Results

	2011	2010
Contributions for plan year beginning July 1:		
Required under funding policy	\$363,886,488	\$329,178,234
Percentage of payroll	41.82%	38.45%
Funding elements for plan year beginning July 1:		
Total normal cost	\$186,255,586	\$179,339,888
Market value of assets	7,418,089,776	6,266,313,282
Actuarial value of assets	7,465,183,643	7,244,429,689
Actuarial accrued liability	9,297,204,318	8,893,618,433
Unfunded/(overfunded) actuarial accrued liability	1,832,020,675	1,649,188,744
Funded ratio	80.29%	81.46%
GASB 25/27 for plan year beginning July 1:		
Annual pension cost	\$368,378,293	\$309,794,712
Actual contributions	--	286,699,384
Percentage contributed	--	92.5%
Covered payroll*	\$870,203,423	\$791,760,493
Demographic data for plan year beginning July 1:		
Number of retired members and beneficiaries	8,496	8,468
Number of vested former members**	1,694	1,739
Number of active members	9,203	9,295
Total compensation	\$870,203,423	\$856,089,559
Average compensation	\$94,556	\$92,102

* For 2010, this represents the actual covered payroll for 2010-2011 as reported by the Retirement Office.

** Includes terminated members due a refund of employee contributions and members receiving Permanent Total Disability (PTD) benefits.

SECTION 2: Valuation Results for The Water and Power Employees' Retirement Plan of the City of Los Angeles

A. MEMBER DATA

The Actuarial Valuation and Review considers the number and demographic characteristics of covered members, including active members, vested terminated members, retired members and beneficiaries.

This section presents a summary of significant statistical data on these member groups.

More detailed information for this valuation year and the preceding valuation can be found in Section 3, Exhibits A, B, and C.

A historical perspective of how the member population has changed over the past ten valuations can be seen in this chart.

CHART 1
Member Population: 2002 – 2011

Year Ended June 30	Active Members	Vested Terminated Members*	Retired Members and Beneficiaries	Ratio of Non-Actives to Actives
2002	7,403	1,426	9,353	1.46
2003	7,731	1,445	9,161	1.37
2004	7,893	1,525	8,973	1.33
2005	7,967	1,397	8,868	1.29
2006	7,926	1,481	8,817	1.30
2007	7,993	1,535	8,746	1.29
2008	8,164	1,548	8,670	1.25
2009	8,868	1,742	8,505	1.16
2010	9,295	1,739	8,468	1.10
2011	9,203	1,694	8,496	1.11

* Includes terminated members due a refund of employee contributions and members receiving PTD benefits.

SECTION 2: Valuation Results for The Water and Power Employees' Retirement Plan of the City of Los Angeles

Active Members

Plan costs are affected by the age, years of service and compensation of active members. In this year's valuation, there were 9,203 active members with an average age of 48.4, average years of service of 17.7 years and average compensation of \$94,556. The 9,295 active members in the prior valuation had an average age of 48.0, average service of 17.6 years and average compensation of \$92,102.

Inactive Members

In this year's valuation, there were 1,694 members with a vested right to a deferred or immediate vested benefit, or entitled to a return of their employee contributions.

These graphs show a distribution of active members by age and by years of service.

CHART 2
Distribution of Active Members by Age as of June 30, 2011

CHART 3
Distribution of Active Members by Years of Service as of June 30, 2011

SECTION 2: Valuation Results for The Water and Power Employees' Retirement Plan of the City of Los Angeles

Retired Members and Beneficiaries

As of June 30, 2011, 6,406 retired members and 2,090 beneficiaries were receiving total monthly benefits of \$34,288,307. For comparison, in the previous valuation, there were 6,358 retired members and 2,110 beneficiaries receiving monthly benefits of \$32,384,494.

These graphs show a distribution of the current retired members and beneficiaries based on their monthly amount and age, by type of pension.

Distribution of Retired Members and Beneficiaries by Type and by Monthly Amount as of June 30, 2011

CHART 5
Distribution of Retired Members and Beneficiaries by Type and by Age as of June 30, 2011

SECTION 2: Valuation Results for The Water and Power Employees' Retirement Plan of the City of Los Angeles

B. FINANCIAL INFORMATION

Retirement plan funding anticipates that, over the long term, both contributions and net investment earnings (less investment fees and administrative expenses) will be needed to cover benefit payments.

Retirement plan assets change as a result of the net impact of these income and expense components. Additional financial information, including a summary of these transactions for the valuation year, is presented in Section 3, Exhibits D, E and F.

The chart depicts the components of changes in the actuarial value of assets over the last ten years. Note: The first bar represents increases in assets during each year while the second bar details the decreases.

CHART 6
Comparison of Increases and Decreases in the Actuarial Value of Assets for Years Ended June 30, 2002 – 2011

SECTION 2: Valuation Results for The Water and Power Employees' Retirement Plan of the City of Los Angeles

It is desirable to have level and predictable plan costs from one year to the next. For this reason, the Board has approved an asset valuation method that gradually adjusts to market value. Under this valuation method, the full value of market fluctuations is not recognized in a single year and, as a result, the asset value and the plan costs are more stable.

The amount of the adjustment to recognize market value is treated as income, which may be positive or negative.

Realized and unrealized gains and losses are treated equally and, therefore, the sale of assets has no immediate effect on the actuarial value.

Please note that as instructed by Plan staff, we have included all but \$74.2 million (approximately 1% of the end of year market value of assets) in the General Reserve and Reserve for Investments Gains and Losses as valuation assets.

The chart shows the determination of the actuarial value of assets as of the valuation date.

**CHART 7
Determination of Actuarial Value of Assets as of June 30, 2011**

SECTION 2: Valuation Results for The Water and Power Employees' Retirement Plan of the City of Los Angeles

Both the actuarial value and market value of assets are representations of the LADWP's financial status. As investment gains and losses are gradually taken into account, the actuarial value of assets tracks the market value of assets. The actuarial asset value is significant because the LADWP's liabilities are compared to these assets to determine what portion, if any, remains unfunded. Amortization of the unfunded actuarial accrued liability is an important element in determining the contribution requirement.

Note that in the chart below, actuarial value of assets are exclusive of a small portion of the General Reserve and Reserve for Investment Gains and Losses while that Reserve is included in the development of the market value of assets.

This chart shows the change in the actuarial value of assets versus the market value over the past ten years.

CHART 8
Actuarial Value of Assets vs. Market Value of Assets as of June 30, 2002 – 2011

SECTION 2: Valuation Results for The Water and Power Employees' Retirement Plan of the City of Los Angeles

C. ACTUARIAL EXPERIENCE

To calculate the required contribution, assumptions are made about future events that affect the amount and timing of benefits to be paid and assets to be accumulated. Each year actual experience is measured against the assumptions. If overall experience is more favorable than anticipated (an actuarial gain), the contribution requirement will decrease from the previous year. On the other hand, the contribution requirement will increase if overall actuarial experience is less favorable than expected (an actuarial loss).

Taking account of experience gains or losses in one year without making a change in assumptions reflects the belief that the single year's experience was a short-term

development and that, over the long term, experience will return to the original assumptions. For contribution requirements to remain stable, assumptions should approximate experience.

If assumptions are changed, the contribution requirement is adjusted to take into account a change in experience anticipated for all future years.

The total loss is \$235,060,725, \$293,059,744 from investment losses and \$57,999,019 in gains from all other sources. The net experience variation from individual sources other than investments was 0.6% of the actuarial accrued liability. A discussion of the major components of the actuarial experience is on the following pages.

This chart provides a summary of the actuarial experience during the past year.

CHART 9
Actuarial Experience for Year Ended June 30, 2011

1. Net loss from investments*	-\$293,059,744
2. Net gain from other experience**	<u>57,999,019</u>
3. Net experience loss: (1) + (2)	-\$235,060,725

* Details in Chart 10

** See Section 3, Exhibit G. Does not include the effect of changes in Plan provisions.

SECTION 2: Valuation Results for The Water and Power Employees' Retirement Plan of the City of Los Angeles

Investment Rate of Return

A major component of projected asset growth is the assumed rate of return. The assumed return should represent the expected long-term rate of return, based on the LADWP's investment policy. For valuation purposes, the assumed rate of return on the actuarial value of assets is 7.75%. The actual rate of return on an actuarial basis for the 2010-2011 plan year was 3.69%.

Since the actual return for the year was less than the assumed return, the LADWP experienced an actuarial loss during the year ended June 30, 2011 with regard to its investments.

This chart shows the gain/(loss) due to investment experience.

CHART 10
Actuarial Value Investment Experience for Year Ended June 30, 2011

1. Actual return	\$266,606,761
2. Average value of assets	7,221,503,286
3. Actual rate of return: (1) ÷ (2)	3.69%
4. Assumed rate of return	7.75%
5. Expected return: (2) x (4)	\$559,666,505
6. Actuarial gain/(loss): (1) – (5)	<u>-\$293,059,744</u>

SECTION 2: Valuation Results for The Water and Power Employees' Retirement Plan of the City of Los Angeles

Because actuarial planning is long term, it is useful to see how the assumed investment rate of return has followed actual experience over time. The chart below shows the rate of return on an actuarial basis compared to the market value investment return for the last ten years, including five-year and ten-year averages.

Based upon recommendations previously adopted by the Board, we have maintained the assumed rate of return of 7.75%.

CHART 11

Investment Return – Actuarial Value vs. Market Value: 2002 - 2011

Year Ended June 30	Net Interest and Dividend Income		Recognition of Capital Appreciation		Change in Asset Method		Actuarial Value Investment Return		Market Value Investment Return

Total	\$1,672,538,831		\$1,149,655,227		\$503,018,121		\$3,325,212,179		\$2,954,187,382	
							Five-year average return	4.79%		4.77%
							Ten-year average return	5.15%		4.80%

Note: Each year's yield is weighted by the average asset value in that year.

SECTION 2: Valuation Results for The Water and Power Employees' Retirement Plan of the City of Los Angeles

Subsection B described the actuarial asset valuation method that gradually takes into account fluctuations in the market value rate of return. The effect of this is to stabilize the actuarial rate of return, which contributes to leveling pension plan costs.

This chart illustrates how this leveling effect has actually worked over the years 2002 - 2011. The return for 2003 reflects a change in asset method.

CHART 12
Market and Actuarial Rates of Return for Years Ended June 30, 2002 - 2011

SECTION 2: Valuation Results for The Water and Power Employees' Retirement Plan of the City of Los Angeles

Other Experience

There are other differences between the expected and the actual experience that appear when the new valuation is compared with the projections from the previous valuation. These include:

- the extent of turnover among the participants,
- retirement experience (earlier or later than expected),
- mortality (more or fewer deaths than expected),
- salary increases different than assumed.

The net gain from this other experience for the year ended June 30, 2011 amounted to \$57,999,019, which is 0.6% of the actuarial accrued liability.

This gain is mainly the result of lower salary increases than expected. See Section 3, Exhibit G for a detailed development of the Unfunded Actuarial Accrued Liability.

SECTION 2: Valuation Results for The Water and Power Employees' Retirement Plan of the City of Los Angeles

D. REQUIRED CONTRIBUTION

The required Department contribution is made up of (a) the normal cost and (b) the amortization of the unfunded or overfunded actuarial accrued liability. For this year, amortization bases are created for the actuarial loss and for the plan changes during the plan year ending June 30, 2011. This produces a net amortization charge of \$219,105,163.

Under the current funding policy, the Department's required contribution rate increased as a percentage of pay. This was primarily the result of the "smoothed" investment return being less than assumed.

The chart compares this valuation's required contribution with the prior valuation.

**CHART 13
Required Contribution**
Year Beginning July 1:

	2011		2010	
	Amount	% of Payroll	Amount	% of Payroll
1. Total normal cost	\$186,255,586	21.40%	\$179,339,888	20.95%
2. Expected employee contributions	<u>-55,048,847</u>	<u>-6.32%</u>	<u>-53,670,455</u>	<u>-6.27%</u>
3. Employer normal cost: (1) + (2)	\$131,206,739	15.08%	\$125,669,433	14.68%
4. Actuarial accrued liability	9,297,204,318		8,893,618,433	
5. Actuarial value of assets	<u>7,465,183,643</u>		<u>7,244,429,689</u>	
6. Unfunded actuarial accrued liability: (4) - (5)	\$1,832,020,675		\$1,649,188,744	
7. Amortization of unfunded actuarial accrued liability	219,105,163	25.18%	191,228,987	22.34%
8. Total required contribution: (3) + (7), adjusted for timing*	<u>363,886,488</u>	<u>41.82%</u>	<u>329,178,234</u>	<u>38.45%</u>
9. Employer match (110% of (2)), adjusted for timing*	62,900,189	7.22%	61,325,204	7.16%
10. Greater of employer match (9) or total required contribution (8)	<u>\$363,886,488</u>	<u>41.82%</u>	<u>\$329,178,234</u>	<u>38.45%</u>
11. Projected compensation	\$870,203,423		\$856,089,559	

* Required contributions are assumed to be paid at the middle of every year.

SECTION 2: Valuation Results for The Water and Power Employees' Retirement Plan of the City of Los Angeles

The contribution requirements as of July 1, 2011 are based on all of the data described in the previous sections, the actuarial assumptions described in Section 4, and the Plan provisions adopted at the time of preparation of the Actuarial Valuation. They include all changes affecting future costs, adopted benefit changes, actuarial gains and losses and changes in the actuarial assumptions.

Reconciliation of Required Contribution Rate

The chart below details the changes in the required contribution rate from the prior valuation to the current year's valuation.

The chart reconciles the contribution rate from the prior valuation to the amount determined in this valuation.

CHART 14

Reconciliation of Required Contribution Rate from July 1, 2010 to July 1, 2011

Required Contribution Rate as of July 1, 2010	38.45%
Effect of actual contributions less than expected contribution	0.42%
Effect of investment loss	3.74%
Effect of gains on salary experience	-1.24%
Effect of losses due to new entrants	0.17%
Effect of other experience*	0.54%
Effect of plan amendments	<u>-0.26%</u>
Total change	<u>3.37%</u>
Required Contribution Rate as of July 1, 2011	41.82%

* Includes effect of increase in total payroll, as well as other differences in actual versus expected experience including mortality, disability, withdrawal and retirement experience.

SECTION 2: Valuation Results for The Water and Power Employees' Retirement Plan of the City of Los Angeles

E. INFORMATION REQUIRED BY THE GASB

Governmental Accounting Standards Board (GASB) reporting information provides standardized information for comparative purposes of governmental pension plans. This information allows a reader of the financial statements to compare the funding status of one governmental plan to another on relatively equal terms.

Critical information to the GASB is the historical comparison of the GASB required contribution to the actual contributions. This comparison demonstrates whether a plan is being funded within the range of GASB reporting requirements. Chart 15 below presents a graphical representation of this information for the Plan.

The other critical piece of information regarding the Plan's financial status is the funded ratio. This ratio compares the

actuarial value of assets to the actuarial accrued liabilities of the Plan as calculated under GASB Standards. High ratios indicate a well-funded plan with assets sufficient to cover the plan's actuarial accrued liabilities. Lower ratios may indicate recent changes to benefit structures, funding of the plan below actuarial requirements, poor asset performance, or a variety of other factors. This information is shown in Chart 16.

The details regarding the calculations of these values and other GASB numbers may be found in Section 4, Exhibits II, III, and IV.

These graphs show key GASB factors.

SECTION 3: Supplemental Information for The Water and Power Employees' Retirement Plan of the City of Los Angeles

EXHIBIT I

Section 415 Limitations

Section 415 of the Internal Revenue Code (IRC) specifies the maximum benefits that may be paid to an individual from a defined benefit plan and the maximum amounts that may be allocated each year to an individual's account in a defined contribution plan.

A qualified pension plan may not pay benefits in excess of the Section 415 limits. The ultimate penalty for non-compliance is disqualification: active participants could be taxed on their vested benefits and the IRS may seek to tax the income earned on the plan's assets.

In particular, Section 415(b) of the IRC limits the maximum annual benefit payable at the Normal Retirement Age to a dollar limit of \$160,000 indexed for inflation. That limit is \$195,000 for 2011. Normal Retirement Age for these purposes is age 62. These are the limits in simplified terms. They must be adjusted based on each participant's circumstances, for such things as age at retirement, form of benefits chosen and after tax contributions.

Benefits in excess of the limits may be paid through a qualified governmental excess plan that meets the requirements of Section 415(m).

Legal Counsel's review and interpretation of the law and regulations should be sought on any questions in this regard.

Contribution rates determined in this valuation have not been reduced for the Section 415 limitation. Actual limitations will result in gains when they occur.

SECTION 3: Supplemental Information for The Water and Power Employees' Retirement Plan of the City of Los Angeles

EXHIBIT J

Definitions of Pension Terms

The following list defines certain technical terms for the convenience of the reader:

Assumptions or Actuarial

Assumptions:

The estimates on which the cost of the Plan is calculated including:

- (a) Investment return — the rate of investment yield that the Plan will earn over the long-term future;
- (b) Mortality rates — the death rates of employees and pensioners; life expectancy is based on these rates;
- (c) Retirement rates — the rate or probability of retirement at a given age;
- (d) Turnover rates — the rates at which employees of various ages are expected to leave employment for reasons other than death, disability, or retirement.

Normal Cost:

The amount of contributions required to fund the benefit allocated to the current year of service.

Actuarial Accrued Liability

For Actives:

The equivalent of the accumulated normal costs allocated to the years before the valuation date.

Actuarial Accrued Liability

For Pensioners:

The single-sum value of lifetime benefits to existing pensioners. This sum takes account of life expectancies appropriate to the ages of the pensioners and the interest that the sum is expected to earn before it is entirely paid out in benefits.

Unfunded Actuarial Accrued

Liability:

The extent to which the actuarial accrued liability of the Plan exceeds the assets of the Plan.

Amortization of the Unfunded

Actuarial Accrued Liability:

Payments made over a period of years equal in value to the Plan's unfunded actuarial accrued liability.

SECTION 3: Supplemental Information for The Water and Power Employees' Retirement Plan of the City of Los Angeles

Investment Return:

The rate of earnings of the Plan from its investments, including interest, dividends and capital gain and loss adjustments, computed as a percentage of the average value of the fund. For actuarial purposes, the investment return often reflects a smoothing of the capital gains and losses to avoid significant swings in the value of assets from one year to the next.

SECTION 3: Supplemental Information for The Water and Power Employees' Retirement Plan of the City of Los Angeles

**EXHIBIT K
Actuarial Balance Sheet**

An overview of the Plan's funding is given by an Actuarial Balance Sheet. In this approach, we first determine the amount and timing of all future payments that will be made by the Plan for current participants. We then discount these payments at the valuation interest rate to the date of the valuation, thereby determining their present value. We refer to this present value as the "liability" of the Plan.

Second, we determine how this liability will be met. These actuarial "assets" include the net amount of assets already accumulated by the Plan, the present value of future member contributions, the present value of future Department normal cost contributions, and the present value of future Department amortization payments or credits.

Actuarial Balance Sheet

<u>Assets</u>	<u>June 30, 2011</u>	<u>June 30, 2010</u>
1. Total actuarial value of assets	\$7,465,183,643	\$7,244,429,689
2. Present value of future contribution by members	520,419,413	516,624,069
3. Present value of future Department contributions for:		
(a) entry age normal cost	1,241,953,209	1,223,061,069
(b) unfunded actuarial accrued liability	1,832,020,675	1,649,188,744
4. Total current and future assets	\$11,059,576,940	\$10,633,303,571
 <u>Liabilities</u>	 <u>June 30, 2011</u>	 <u>June 30, 2010</u>
5. Present value of benefits for retirees and beneficiaries:	\$4,634,291,818	\$4,375,920,216
6. Present value of benefits for terminated vested members:	173,440,441	156,087,180
7. Present value of benefits for active members:	6,251,844,681	6,101,296,175
8. Total liabilities	\$11,059,576,940	\$10,633,303,571

Reserves and Designated Balances

	<u>June 30, 2011</u>	<u>June 30, 2010</u>
1. Reserve for retirement allowance for retired members	\$4,816,565,276	\$4,577,003,038
2. Contribution accounts:		
(a) Members (excluding additional contributions)	1,174,202,075	1,080,640,262
(b) Department of Water and Power	(1,195,535,211)	(1,169,873,656)
3. General Reserve and Reserve for Investment Gains and Losses*	<u>1,969,085,633</u>	<u>1,820,273,842</u>
4. Total	\$6,764,317,773	\$6,308,043,486

* *Out of the total General Reserve and Reserve for Investment Gains and Losses, \$74,180,898 and \$62,663,133 are not included as valuation assets as of June 30, 2011 and June 30, 2010, respectively.*

SECTION 3: Supplemental Information for The Water and Power Employees' Retirement Plan of the City of Los Angeles

**EXHIBIT M
Adjusted Reserves**

Each year the Retirement Board adjusts its retired reserves to agree with the value calculated during the valuation. The following table presents the required transfers.

<u>Adjusted Reserves</u>	<u>June 30, 2011</u>	<u>June 30, 2010</u>
1. Retired reserve balance	\$4,816,565,276	\$4,577,003,038
2. Actuarially computed present value	4,634,291,818	4,375,920,216
3. Actuarial gain (loss): (1) – (2)	182,273,458	201,082,822
4. Transfer from (to) DWP contribution accounts from retired reserves:	(182,273,458)	(201,082,822)

SECTION 4: Reporting Information for The Water and Power Employees' Retirement Plan of the City of Los Angeles

EXHIBIT I

Summary of Actuarial Valuation Results

The valuation was made with respect to the following data supplied to us:

1. Retired members as of the valuation date (including 2,090 beneficiaries in pay status)	8,496
2. Members inactive during year ended June 30, 2011 with vested rights*	1,694
3. Members active during the year ended June 30, 2011	9,203

The actuarial factors as of the valuation date are as follows:

1. Normal cost	\$186,255,586
2. Present value of future benefits	11,059,576,940
3. Present value of future normal costs	1,762,372,622
4. Actuarial accrued liability	9,297,204,318
Retired members and beneficiaries	\$4,634,291,818
Inactive members with vested rights*	173,440,441
Active members	4,489,472,059
5. Actuarial value of assets (\$7,418,089,776 at market value as reported by Retirement Office)	7,465,183,643
6. Unfunded actuarial accrued liability	\$1,832,020,675

* Includes terminated members due a refund of member contributions and members receiving PTD benefits.

SECTION 4: Reporting Information for The Water and Power Employees' Retirement Plan of the City of Los Angeles

EXHIBIT I (continued)

Summary of Actuarial Valuation Results

The determination of the required contribution is as follows:	Dollar Amount	% of Payroll
1. Total normal cost	\$186,255,586	21.40%
2. Expected employee contributions	<u>-55,048,847</u>	<u>-6.32%</u>
3. Employer normal cost: (1) + (2)	\$131,206,739	15.08%
4. Amortization of unfunded actuarial accrued liability	<u>219,105,163</u>	<u>25.18%</u>
5. Total required contribution: (3) + (4), adjusted for timing*	\$363,886,488	41.82%
6. Employer match (110% of (2)), adjusted for timing*	62,900,189	7.22%
7. Greater of (6) employer match or (5) total required contribution	\$363,886,488	41.82%
8. Projected payroll	\$870,203,423	

* *Required contribution is assumed to be paid at the middle of every year.*

* *Not less than zero*

SECTION 4: Reporting Information for The Water and Power Employees' Retirement Plan of the City of Los Angeles

EXHIBIT IV

Supplementary Information Required by the GASB

Valuation date	July 1, 2011
Actuarial cost method	Entry Age Normal Cost Method
Amortization method	Level dollar amortization
Remaining amortization period	The July 1, 2004 Unfunded Actuarial Accrued Liability is amortized over a 15-year period commencing July 1, 2004. Any subsequent changes in Unfunded Actuarial Accrued Liability are amortized over separate 15-year periods effective with that valuation.
Asset valuation method	The market value of assets less unrecognized returns in each of the last five years. Unrecognized return is equal to the difference between the actual market returns and the expected returns on a market value basis, and is recognized over a five-year period.
Actuarial assumptions:	
Investment rate of return	7.75%
Inflation rate	3.50%
Projected salary increases	5.35% to 10.50%*
Cost of living adjustments	3.00% (actual increases are contingent upon CPI increases with a 3.00% maximum)
Plan membership:	
Retired members and beneficiaries receiving benefits	8,496
Terminated members entitled to, but not yet receiving benefits	1,694
Active members	<u>9,203</u>
Total	19,393

* Includes inflation at 3.50%, "across the board" increases of 0.75%, plus merit and promotional increases. See Exhibit VI for these increases.

* The amount indicated for June 30, 2012 assumes the actual employer contribution for the year is equal to the employer annual required contribution.

SECTION 4: Reporting Information for The Water and Power Employees' Retirement Plan of the City of Los Angeles

EXHIBIT VI

Actuarial Assumptions and Actuarial Cost Method

Mortality Rates:

*After Service Retirement
and Pre-retirement:*

RP-2000 Combined Healthy Mortality Table with ages set back two years for males and one year for females.

After Disability Retirement

RP-2000 Combined Healthy Mortality Table with ages set back two years for males and one year for females.

The tables shown above were determined to contain sufficient provision appropriate to reasonably reflect future mortality improvement, based on a review of mortality experience as of the measurement date.

Termination Rates before Retirement:

Age	Rate (%)					
	Mortality*		Disability		Total Withdrawal**	
	Male	Female	Male	Female	Male	Female
25	0.037	0.020	0.006	0.000	6.550	9.200
30	0.039	0.025	0.012	0.006	4.350	7.250
35	0.063	0.044	0.012	0.036	3.060	5.550
40	0.096	0.065	0.018	0.072	2.180	4.150
45	0.130	0.103	0.030	0.102	1.660	3.150
50	0.186	0.155	0.054	0.138	1.260	2.450
55	0.292	0.242	0.126	0.168	0.980	2.100
60	0.527	0.444	0.240	0.000	0.720	1.100
65	1.001	0.862	0.000	0.000	0.420	0.350

* 5% of pre-retirement deaths are assumed to be duty related, with the remaining being non-duty related.

** No withdrawal is assumed after a member is first assumed to retire. Ordinary withdrawal members are assumed to receive their account balance at termination. Vested termination members are assumed to receive a deferred retirement benefit. 45% of terminations are assumed to be ordinary withdrawals, with the remaining being vested terminations.

SECTION 4: Reporting Information for The Water and Power Employees' Retirement Plan of the City of Los Angeles

Retirement Rates:	Age	Under 30 Years of Service	Over 30 Years of Service

	66	15.00	25.00
	67	15.00	25.00
	68	15.00	25.00
	69	15.00	25.00
	70	100.00	100.00

Benefit for Inactive Vested Members:

Inactive vested members are assumed to retire at age 60 with a Money Purchase Annuity. Members receiving Permanent Total Disability benefits are assumed to retire at the earlier of age 60 or age 55 with 30 years of service.

Definition of Active Members:

First day of biweekly payroll following employment for new department employees or immediately following transfer from other city department.

Unknown Data for Members:

Same as those exhibited by Members with similar known characteristics. If not specified, Members are assumed to be male.

SECTION 4: Reporting Information for The Water and Power Employees' Retirement Plan of the City of Los Angeles

Data Adjustments: Data as of March 31 has been adjusted to June 30 by adding three months of age and, for active employees, three months of service. Contribution account balances were also increased by three months of interest. For members in pay status, we have increased their benefits by the assumed July 1 COLA.

Percent Married/Domestic Partner: 85% of male members and 60% of female members are assumed to be married at pre-retirement death or retirement. Spousal gender is assumed to be opposite that of the member.

Age of Spouse: Females are 3 years younger than their spouses.

Future Benefit Accruals: 1.0 year of service per year.

Other Government Service: Members are assumed to purchase an additional 0.15 years of service per year.

Consumer Price Index: Increase of 3.50% per year; benefit increases due to CPI subject to 3.00% maximum.

Employee Contribution, Additional Annuity and Matching Account Crediting Rate: 7.75%, based on Plan provisions.

Net Investment Return: 7.75%, net of administration and investment expenses.

Salary Increases: Annual Rate of Compensation Increase
 Inflation: 3.50% per year, plus “across the board” salary increases of 0.75% per year, plus the following merit and promotional increases.

<u>Years of Service</u>	<u>Increase</u>
0	6.25%
1	5.25%
2	4.75%
3	3.50%
4	2.00%
5 & Over	1.10%

The merit and promotional increases are added to the sum of the inflationary and “across the board” salary increases.

SECTION 4: Reporting Information for The Water and Power Employees' Retirement Plan of the City of Los Angeles

Actuarial Value of Assets: The market value of assets less unrecognized returns in each of the last five years. Unrecognized return is equal to the difference between the actual and expected returns on a market value basis and is recognized over a five-year period. As directed by the Retirement Office, the actuarial value of assets may be reduced by an amount classified as a non-valuation reserve.

Actuarial Cost Method: Entry Age Normal Actuarial Cost Method. Entry Age equals attained age less years of service. Normal Cost and Actuarial Accrued Liability are calculated on an individual basis and are based on costs allocated as a level percent of salary, with Normal Cost determined as if the current benefit accrual rate had always been in effect.

Funding Policy: The Department of Water and Power makes contributions equal to the Normal Cost adjusted by an amount to amortize any Surplus or Unfunded Actuarial Accrued Liability. Both the Normal Cost and the Actuarial Accrued Liability are determined under the Entry Age Normal Cost method. The July 1, 2004 Unfunded Actuarial Liability is amortized over a fifteen-year period commencing July 1, 2004. Any subsequent change in Surplus or Unfunded Actuarial Accrued Liability are amortized over separate fifteen-year periods. All amortization amounts are determined in equal dollar amounts over the amortization period. The Board may, by resolution, adopt a separate period of not more than thirty years to amortize the change in Surplus or Unfunded Actuarial Accrued Liability resulting from an unusual event, plan amendment or change in assumptions or methods. The Department of Water and Power contribution is not less than the matching contribution of 110% of member contributions.

SECTION 4: Reporting Information for The Water and Power Employees' Retirement Plan of the City of Los Angeles

Changes in Actuarial Assumptions: The following assumption was changed based on a change in Plan provisions. Previously, this assumption was as follows:

Employee Contribution, Additional Annuity and Matching Account

Crediting Rate: 8.00%, based on Plan provisions.

SECTION 4: Reporting Information for The Water and Power Employees' Retirement Plan of the City of Los Angeles

EXHIBIT VII

Summary of Plan Provisions

This exhibit summarizes the major provisions of the LADWP included in the valuation. It is not intended to be, nor should it be interpreted as, a complete statement of all plan provisions.

Plan Year: July 1 through June 30

Census Date: March 31

Formula Retirement Benefit:

Age & Service Requirement

Age 60 with 5 years of service

Age 55 with 10 years of service in the last 12 years

Any age with 30 years of service; or

Receiving permanent total disability benefits from the Plan.

Note: To be eligible, the employee must have worked or been paid disability four of the last five years immediately preceding eligibility to retire, or while eligible to retire.

Monthly Amount

The greater of 2.1% of the Monthly Salary Base or \$9.50 per year of service. For those age 55 or older with 30 or more years of service the factor is 2.3% of the Monthly Salary Base.

Monthly Salary Base

Equivalent of monthly average salary of highest continuous 26 biweekly payroll periods (one year).

Cost of Living benefit

Based on changes to Los Angeles area consumer price index to a maximum of 3% per year.

Money Purchase Annuity:

A monthly lifetime benefit equal in value to the employee normal contribution account plus Department matching contribution (current service contribution) account at retirement date.

SECTION 4: Reporting Information for The Water and Power Employees' Retirement Plan of the City of Los Angeles

Minimum Benefit: If the money purchase annuity amount exceeds the monthly amount of the formula retirement benefit and the retiree meets the eligibility requirements for the formula retirement benefit, the amount of the money purchase annuity is paid and the cost-of-living and death after retirement continuance features of the formula retirement benefit are also paid.

Early Retirement Reduction Factors: The early retirement factor is determined by the attained age on the effective date of retirement. Every three months of attained age will affect the factor.

Attained Age at Actual Retirement	Exact Age	+3 Months	+6 Months	+9 Months
48	.7150	.7225	.7300	.7375
49	.7450	.7525	.7600	.7675
50	.7750	.7825	.7900	.7975
51	.8050	.8125	.8200	.8275
52	.8350	.8425	.8500	.8575
53	.8650	.8725	.8800	.8875
54	.8950	.9025	.9100	.9175
55	.9250	.92875	.9325	.93625
56	.9400	.94375	.9475	.95125
57	.9550	.95875	.9625	.96625
58	.9700	.97375	.9775	.98125
59	.9850	.98875	.9925	.99625
60 & Over	1.0000			

The factor is 1.0000 for those retiring at age 55 or later with at least 30 years of service.

SECTION 4: Reporting Information for The Water and Power Employees' Retirement Plan of the City of Los Angeles

Member Normal Contributions:

If an employee became a plan member after May 31, 1984, the member normal contribution rate is 6% of pay.

If an employee became a plan member before June 1, 1984 or transferred from CERS with an entry age contribution rate, sample rates by entry age are as follows:

Entry Age	Rate
20	2.601%
25	3.102%
30	3.611%
35	4.161%
40	4.742%
45	5.381%
50	6.042%
55	6.762%

Department Current Service Contributions:

The Department of Water and Power makes actuarially based contributions that are a minimum of 110% of employee contributions.

Disability:

Disability benefits are paid from the Disability Fund. However, if a member is receiving permanent and total disability benefits, the member may elect to retire. Other than a nominal amount, no service credit during disability is earned for the 2.1% formula; however, credit is earned during disability toward the \$9.50 minimum formula.

Deferred Withdrawal Retirement Benefit (Vested):

Age & Service Requirement

Age 60 with one year of contributing membership; or
 Age 55 with 10 years of contributing membership in the 12 years prior to separation from service.

Amount

Value of employee normal contribution account plus Department matching contribution (called current service contribution) account at retirement date.

SECTION 4: Reporting Information for The Water and Power Employees' Retirement Plan of the City of Los Angeles

Death Before Retirement:

<i>Age and Service Requirement</i>	None
<i>Amount</i>	Refund of member contributions with interest.
<i>Age, Service and Type of Death Requirement</i>	Any death of a member who is eligible for service retirement, but who has not yet retired or attained 25 years of service
<i>Amount</i>	In lieu of the refund of member contributions with interest, the member's spouse may elect an immediate lifetime monthly allowance. The monthly allowance payable to the surviving spouse is the amount the spouse would have received had the member elected a full joint and survivor allowance.
<i>Age, Service and Type of Death Requirement</i>	Duty death with 10 years of service, but prior to service retirement eligibility or attainment of 25 years of service
<i>Amount</i>	In lieu of the refund of member contributions with interest, the member's spouse may elect either: <ul style="list-style-type: none">(a) A deferred lifetime monthly allowance commencing when the member would have been eligible for a service retirement or attained 25 years of service; or(b) An immediate lifetime monthly allowance calculated with up to five years added to the member's age or service. This option is only available if the member has attained age 50 or attained 20 years of service. The monthly allowance payable to the surviving spouse is the amount the spouse would have received had the member elected a full joint and survivor allowance.

Death After Retirement: 50% of retiree's unmodified allowance continued to eligible spouse or domestic partner (reduced if difference in ages is greater than five years).

Withdrawal of Contributions Benefit (Ordinary Withdrawal): Refund of employee contributions with interest.

SECTION 4: Reporting Information for The Water and Power Employees' Retirement Plan of the City of Los Angeles

Changes in Plan Provisions:

The following changes in Plan provisions have been recognized since the prior valuation:

Effective December 1, 2010, members may elect additional distribution options for their Additional Annuity contributions.

Effective April 13, 2011, the interest crediting rate on employee, Additional Annuity and Department matching contributions was decreased from 8.00% to 7.75% per annum.

NOTE:

The summary of major Plan provisions is designed to outline principle Plan benefits as interpreted for purposes of the actuarial valuation. If the Retirement Office should find the Plan summary not in accordance with the actual provisions, the Retirement Office should alert the actuary so they can both be sure the proper provisions are valued.
